The four patent search options are listed below. We recommend the Comprehensive search because the last thing you need, half-way through getting your invention ready for the market and after spending lots of money, only to find that a patent or product in Japan or Germany or wherever interferes with your invention.

Here are options. Click on the one you want. We will get to work on it right away. Please keep in mind that a thorough search doesn't happen overnight. It can take from one to three weeks to complete.
